SER Text

SW observed the new born, Baby Boy West at Good Sam Hospital. He is in the special intensive care nursery. He is experiencing "Tachypnea", which is fast respiration. He is on 35% oxygen. He is currently on antibiotics to fight an infection which could have been caused from swallowing the meconium fluid. The baby's blood sugar is normal. Due to the baby's weight of 10 pounds 2 oz and the baby's skin being extremely dry, they believe the

baby was definitely post date.

SW, Susan Webber reports that the "alleged" father Luis Ewing, refused to signed the paternity affidavit and has been uncooperative with hospital staff. Mr. Ewing is presenting himself as a federal attorney and continues to tell the hospital staff they are violating RCW and he is quoting them. Katherine West explained to Susan Webber, that she took an energy pill that a neighbor gave her. Susan reports that the mother does not have any open pick soars. Katherine reported to her that she did smoke marijuana during pregnancy and drank alcohol during pregnancy. Katherine did not receive prenatal care during her whole pregnancy. She believes this is Katherine's fourth child and there is a five year old at home.

Dr. Kenneth Jolly, 253-848-1572 is the baby's physician. The baby was placed on hospital hold.

SER Text

SW met with biological mother, Katherine West. She will be in the hospital for at least 3 days, She is recovering from a C-section. SW introduced self and Katherine knew why she was there. Katherine explained to SW that she is shocked that she tested positive for drugs. She reports that she took an energy pill from a neighbor because she did not have any energy. She was "pooped" the last month of pregnancy. The pill was yellow and she took it two days ago either Sat or Sun. She wanted to put up the Christmas tree and she wanted to stay up to do it. She takes care of six cats, a five year old and Luis. Her five year old's name is M■■■■ T■■■■. DOB is ■■■■■. She does not know who the biological father is. She reports that she was married to Miles Tejano, II, in 2001. She had a one night stand. SW asked if paternity been established she stated no. SW asked how she know that her husband is not the bio father, she stated because her son "is half black". She is having troubles with DSHS because they are going after Miles Tejano II for child support even though that is not his child. Susan Webber explained to her that Miles II is the legal father because they were married. Katherine stated that they are not legally divorce but have been separated sine 2003. She has a permanent restraining order on him due to domestic violence. Susan W. explained to her since she is not legally divorce, that Miles II will be named the "legal" father of the new born baby. Katherine was not happy to hear that. Katherine stated that Luis is the biological father and she has no doubts of it. SW asked why he refused to sign the paternity affidavit, she responded he is probably scared of what is going on. Katherine was married before Miles II. Her first husband is Jerry West and they have two children together. She does not have custody of her daughters, She stated when she decided to leave her husband, he "made" her sign a letter stating that she was abandoning the family and he later used it in court. Her daughter are age 13 and 9 years old. Mr. West is remarried and the current wife does not like Katherine. Katherine stated she has not seen the girls since Jerry accused her of smoking marijuana with her oldest daughter. That allegation was reported in April of 05. (Referral # 1610298 accepted as LRS). Katherine denied the incident happened. She states that Jerry is a good father to the girls.

M■■■■ attends PM kindergarten at Naches Trail Elementary. His teacher is Ms. Stowe. She likes his teacher and Katherine states she volunteers at the school. This year she has volunteered four times this year. She also brings cupcakes to the class and helped with a book drive.

SW asked about Luis Ewing. Katherine met him 4 years ago at Fox's strip joint. He is a federal attorney, who works for himself. She states that he works for two different Indian tribes, however, did not know which ones. He gets paid independently from the Federal Barr. She states he is a wonderful man, who takes care of her. His birth date is 12/08/61, he will be 44 years old. She states that she trust Luis and the reason why he is being

uncooperative is because this is his first child and he doesn't understand what is going on. SW asked if he knew, that she tested positive. She stated that he knew about the energy pill and he can't believe that she tested positive. M [REDACTED] calls him dad, because he does not have contact with Miles II or his biological father. She reports that Luis and M [REDACTED] get along great and Luis takes care of him as his own. She reports that they are hoping to get married and they want more children. They do not receive TANF or state assistance, besides medical for the baby. She stated that Luis makes enough to pay rent and buy good food. Luis doesn't make alot of money, however, he is able to provide for them.

T/C to Lewis Ewing at 4:15 pm in response to a message left, 253-226-3741. The call was a conference call

with Native American Specialist Rachel Brown in attendance.

Mr. Ewing indicated that he wanted to make a complaint against the assigned social worker and that he wanted to know who he could contact in Olympia. He was given the number to Constituent Relations.

I asked Mr. Ewing for information concerning his Native American Status. He indicated to me that he was not going to answer any of my "investigative" questions. He further indicated that he had not called me to answer questions. He went on to say that CPS had no right to ask him any questions about himself or his wife. I explained that knowing his Native American Status would be helpful in notification to the appropriate tribe and the delivery of services to his child and wife. Native American Specialist Rachel Brown echoed the same information to him.

Mr. Ewing was not willing to give any information. He seemed intent on arguing the legal merits of his case. I informed him that he could certainly make his argument to the court. The conversation was concluded at this point.

After staffing with Kate Orlando, Michael Jaurigue, Amanda Johnson and Dawn Cooper, I left a message for both parents asking that they call me back so that we could discuss returning their child. Father called me back and was very argumentative, continually quoting RCWs and stating who he was going to sue and why. I explained that I was not an attorney and that I did not call to talk to him about RCWs but that I wanted to talk to him about returning the child. I explained that the child was having difficulty feeding but that if he or mother were

agreeable with going to the PICC faculty in Kent where they could be trained on feeding, and if they could demonstrate that they could feed that we could return the child to them today. He stating that this was not necessary as mother has had three other children and does not need the training. I explained that being trained on feeding was still a requirement due to the child being a difficult feed and explained that I would consult with my supervisor and would call him back.

I called him back and he was still very argumentative and I again explained that I did not want to talk about legal matters, that I just wanted to talk about returning his child and he agreed that if he did not have to sign anything that mother would come to PICC and have the training even though he did not think it was necessary. He said that he could not be there because he was a Federal Attorney and was meeting with a large law firm and had clients to see. I explained that after the child comes home that I would like to be able to contact them and come to their home to see how the child was doing and he said that I could not come to the home. By the end of the conversation he was less argumentative and stated that he was 42 years old and this was his first child and he just wanted his child to be home. He said that they were going to take the child in to a doctor as soon as they picked him up.

I spoke with mother on the phone and she was willing to come to PICC and take the training. I spoke with father again on the phone about directions to PICC and he was not argumentative at that time. I ask if they had a car seat with them and he said that they had a car seat and started to talk about all the baby things they had bought for the baby.

I met mother at PICC and she was very receptive me and to PICC staff and the feeding training. Mother was at PICC for about an hour working with staff on feeding. Mother was very appropriate and nurturing toward the child. When they brought the child to her she cried and held him close and talked to him. She changed him and looked him over stating that she was looking for marks or bruises. She maintained her focus on the child while at PICC, gently talking to him, feeding him, burping him and giving him a kiss every so often. Mother brought a male family friend with her who said he was their spiritual advisor. He talked about raising his own children, he was very appropriate and receptive to CPS and PICC staff. He called father on the phone while he was there and let him know that mom was feeding the child. Mother said that her father was anxious to see the child and that he lives just around the corner from them. PICC staff talked to mom about the child being a difficult feed and that she needed to make sure he was getting the necessary amount of formula and that he needed to have his weight closely monitored. Mother agreed and said that they have a pediatrician for the 5 year old but were not sure that they were going to use the same pediatrician for the baby but that they would get him set up with a pediatrician quickly. Mother talked about breast feeding and we talked again about the importance of continual weight checks, especial if breast feeding due to not being able to monitor how much the child was taking in. Mother took the cards from PICC and said she would call if she had any questions or concerns and I talked to her about PIC services and she agreed to call me if she felt she needed assistance. I explained to mother that my goal was that the child was safe and healthy and she said that was her goal also. I said that if we have the same goal that we should be able to work together and she expressed that CPS and the Department are hard to trust but that but that she did not mean that personally toward me. Mother expressed that she was nervous, and that she had not been able to eat while the baby was not with her, that she felt to "guilty to eat." I explained to mother that I had talked to father about me being able to come to the home and he had said no but that I felt she had some say in that also and she did not respond. Mother agreed to call me tomorrow and let me know how the child fed after he was home.

Mother had agreed to call the social worker to let me know how the feeds were going. Mother has not called.

I left a message for mother asking how things were going with feeding, gave her the number for PICC as a resource if she is having feeding issues, left my number to call, offered to help her located services if needed, reiterated the need to get the baby set up with a pediatrician.

Transfer Summary

Baby Boy West tested positive for Meth and ecstasy at birth. Mother, Katherine West also tested positive for Meth, ecstasy, and marijuana during delivery. Baby Boy West has not been named as of this writing. Baby was transferred to PICC on a VPA, which was signed by Katherine West. A safety plan was created for 5 year old, M■■■■, who resides in the home.

Alleged father, Luis Ewing, has not been cooperative with SW. Luis Ewing is stating he and Katherine are Native America, however, He refused to share information with assigned SW. Luis Ewing appears to be suing department as well as SW. Katherine West initially cooperated with SW, however, has stopped. Katherine West requested to revoke her VPA.

During the baby's visit at Picc, he was experiencing difficulties with feedings. He needed encouragement at the end of each feeding.

Decision was made by AA, that if mother can demonstrate how to feed the baby properly, the baby can return to the mother. Audrey Moore will try to engage the family.

Case will be transferring to on going SW, Audrey Moore.
